Ref: Microsoft Bravern Tenant Improvement Projects

Dear Rob,

On behalf of Howard S. Wright Constructors I want to personally express my appreciation for a job very well done by Corporate Casework on the Microsoft Bravern 1 and 2 projects. As you know, these tenant improvement projects were fast paced and demanded high quality craftsmanship. CCI rose to the challenge on both fronts and provided HSW and our clients with an excellent, on time, product.

From the inception of the project your team of Jason Eversole, Brian Ralls and Brian Yoder started things off in the right direction by seeing that product samples and shop drawings were developed which were accurate, thorough and met the approval of the architect, CollinsWoerman. CCI's field execution, led by Mark Pedersen, was similarly on top of things with the ability to fluctuate installation crews to meet the ever changing schedule and priorities, including the necessary overtime expended, to keep the construction progress and completion dates on track.

Thank you again for providing Howard S. Wright with this "best in class" service. We look forward to working with CCI again on future projects.

Sincerely,  
Howard S. Wright Constructors

Jim Rowley  
Sr. Project Manager
